

Summary of direct quotes taken from student reviews from the multilevel linear modeling and structural equation modeling workshops offered in 2009 and 2010

Please share any other comments you might have.

You both do a fantastic job in every respect. I especially appreciate the quality of the materials, the clarity of the presentation, responsiveness to participants, & the humor & enthusiasm (and the facilities are great too). I recently took another special-topics stats class elsewhere, and since I ~~had~~ had already taken a class ~~for~~ from you.... let's just say you both set the bar pretty high and ~~this~~ this other person's course offering left much to be desired! Thank you Dan & Patrick for this great learning opportunity!!

THE STRUCTURE & CONTENT WAS PERFECTLY MATCHED WITH MY LEARNING STYLE!

THE MOST RETURN ON MY RESEARCH/TRAINING DOLLARS I'VE EVER ACHIEVED.

I talked with other attendees and we agreed that your instructional style was nothing short of gifted.

Dear Don & Patrick,

I cannot emphasize enough how much I enjoyed this course. You are both excellent teachers and I feel very fortunate to have had the opportunity to learn with you. The materials, slides, etc. were tremendous and your styles are so very complimentary to my learning style. Best Class Ever!

Amazing workshop, well designed and even better taught! Perfect combination of theory & concrete examples. Course notes are fantastic!

excellent!

outstanding job!

Thank you! this was a great course!

Please email out any future course offerings.

The workshop was great!

The workshop far exceeded my expectations. Your talents + enthusiasm ~~are~~ for the topic make your teaching exceptionally effective. I can already ~~to~~ think of several concrete examples of how my research designs, manuscripts + grant proposals will be better due ~~to~~ directly to what I've learned this week.
Thank you!

None, I thought this was a great workshop that is applicable regardless of your past experience with multilevel models. Great job!

I am looking forward to attending
your workshops in the future.
Thank you!

Thank you very much!!

Highly enjoyable class even for a person
being exposed to these analytic methods
for the first time.

This course greatly exceeded my expectations. ~~As~~ ^{As} ~~even~~
a person without a strong statistical background, I found
the course very accessible and it moved at a pace
that made it easy to digest the information.

Brilliant! Thank you both for offering the course!!

This was a fantastic workshop. I'm pretty sure that I'm at least 10% smarter, though that should be empirically tested. 😊

Your workshops were highly recommended to me & now I'll do the same! Thanks!!

I was very impressed with the organization, pace, and quality of instruction - it exceeded my high expectations. I appreciated the reviews each day and having you both trade off with instruction and reviews was great. Don't change all the good stuff!

Fabulous! Thanks so much

You were great teachers who explain and break things down very well and make something that is "scary" not so scary/intimidating anymore.

Thanks!

Great class; possibly the best methods class I've attended. The co-teaching not only helps things flow, and keeps any monotone from settling in, but also provides a different perspective when one reviews material the other covered the day before and this really helped in my understanding. Also examples were very helpful.

So much fun and so informative!
Thanks

very engaging speakers.
I really enjoyed this experience.

This is by far the most comprehensive workshop I've ever taken. Very well taught; well balanced in terms of theoretical content and practical applications. Most delectably, a workshop I would recommend to anyone seriously interested in correctly applying these techniques.

Excellent workshop even for novice learners. Thanks for making me well informed and fun.

Great class overall - thank you!!

This was incredibly helpful! My knowledge of SEM was rudimentary at best coming into this, and even though there was a lot more material than I was able to digest, I feel like I got it now. With the materials & sample data sets I know that I will continue to make connections. Thank you so much for hosting this. I would love to attend another seminar on this or related ^{things!}

It was wonderful! - Very helpful. Thanks so much!

overall - wonderful!

I'd take any course here again
